

# OSHA Construction 10-Hour Training

*A comprehensive training designed for construction industry workers and employers on the recognition, avoidance, and prevention of safety and health hazards found in the workplace*

This program also provides information on employer responsibilities, workers' rights, and the complaint process.

Today, an increasing number of customers are requiring this OSHA certification from their contractors. Several states have already made it a requirement for jobs and more are expected to follow this trend.

**Topics to be covered over the 2-day course:**

- Struck By and Caught In or Between Hazards
- Electrical Safety
- Fall Protection
- Ladder Safety
- Excavation Safety
- Scaffold Safety
- Materials Handling
- Crane Safety
- Personal Protective Equipment (PPE)
- Confined Space Entry
